EDUCATION

Oriental Institute of Science and Technology — Bhopal, (M.P)
Bachelor of Technology in Computer Science Engineering, CGPA - 6.59 — *Oct. 2022 – June 2026*

St. Joseph's Convent Senior Secondary School — Khandwa, (M.P)
CBSE Board Class XII - 70% — *Apr. 2019 – March 2020*

St. Joseph's Convent Senior Secondary School — Khandwa, (M.P)
CBSE Board Class X - 61.8% — *Apr. 2017 – March 2018*

PROFILE

Computer Science Engineering graduate with a strong foundation in Java, Data Structures & Algorithms, and software engineering fundamentals. Hands-on experience building full-stack web applications using React.js, Node.js, Express.js, and MongoDB, including AI-powered solutions and scalable REST APIs. Skilled in writing clean, efficient, and maintainable code with a strong focus on problem-solving, continuous learning, and delivering user- centric applications.

PROJECTS

Smart Code Analyzer | ***Technologies*** **:** *React.js (Vite) · Node.js · Express · MongoDB · Monaco Editor · LLM API*

- Built an AI-powered code analysis pipeline that evaluates submissions across time complexity, space complexity, and algorithmic edge cases — turning passive code review into a structured, metric-driven feedback loop.
- Engineered a client-side validation layer with a 3-second debounce mechanism that filters invalid requests before they reach the LLM, cutting unnecessary API calls by 40% and ensuring every token spent is one worth spending.
- Designed a custom prompt engineering system on Node.js/Express that embeds evaluation criteria directly into the model's reasoning — producing consistent, structured feedback rather than generic LLM output.
- Integrated MongoDB session persistence to store and retrieve past code reviews, giving users a longitudinal record of their algorithmic improvement over time.

TaskFlow - SaaS Project Management Platform | ***Technologies*** **:** *React.js, Node.js, Express.js, MongoDB, Stripe API*

- Developed a subscription-based SaaS platform enabling teams to collaborate on projects with features including task management, file sharing, real-time updates, and team analytics dashboard.
- Implemented secure user authentication system supporting email/password registration and OAuth 2.0 social login (Google, GitHub) with JWT token-based session management and role-based access control (Admin, Manager, Member).
- Integrated Stripe payment gateway to handle subscription plans (Free, Pro, Enterprise) with recurring billing, proration logic, webhook handling for payment events, and automated invoice generation.

TECHNICAL SKILLS

Languages : Java, JavaScript

Frontend Technologies : HTML, CSS, React.js, Tailwind CSS, Redux

Backend Technologies : Node.js, Express.js, RESTful API

Databases : MongoDB, MySQL

Core CS : Data Structures and Algorithms, OOPs, DBMS, Operating System, Computer Networking

Developer Tools : Git, Git hub, VS Code, Postman, Vercel
